Mathematical Models in Biology: **PDE & Stochastic Approaches**

April 20-22, 2020 – Vienna

The purpose of the workshop is to bring together excellent mathematicians contributing to the field of Mathematical Biology. In particular we aim to highlight the variety of biological phenomena that can be modelled, the diversity of PDE and Stochastic techniques in use, and the connection between them. Participants are invited to present their own reasearch during the poster session. Financial support for PhD and master students presenting a poster is available up to a certain amount.

Confirmed speakers

Ellen Baake

Jean Clairambault

Location

Technical University of Vienna **TUtheSky** Getreidemarkt 9

Carina Geldhauser

Tommaso Lorenzi

Angelika Manhart

Sara Merino-Aceituno

Benoît Perthame

Jan-Frederik Pietschmann

Mariya Ptashnyk

Emmanuel Schertzer

Helmut Schmidt

1060 Vienna

Organizers

Alexandra Holzinger (TU Wien) Laura Kanzler (University of Vienna) Giulia Pilli (University of Vienna)
